

# Cochrane Master Builders

## ## Universal Website Template Wireframe Plan

---

### ## Purpose Of This Wireframe System

This document is the base website template plan for the full Cochrane Master Builders service ecosystem.

The goal is to create one premium, consistent, SEO-ready, performance-optimized website structure that can be reused across all service-specific domains while still feeling custom to each service category.

Every website should feel like it belongs to the same family-owned builders' network, but each one should still feel tailored to the service: roofing should feel protective and durable, tile should feel precise and crafted, basement suites should feel safe and income-focused, landscaping should feel outdoor and lifestyle-driven, and custom homes should feel aspirational and legacy-focused.

The template must support:

- The same master brand identity across all domains.
- A consistent navigation system.
- A consistent contact form.
- A strong home hero section.
- A strong service-specific homepage template.
- A reusable service page structure.
- A reusable pricing section.
- A reusable areas-we-serve section.
- A reusable SEO-focused area landing page system.
- Fast loading, mobile-first performance.
- Simple content swapping for all 115 service websites.

---

### ## Core Template Philosophy

The system should not feel like 115 random websites.

It should feel like one high-trust construction network with 115 highly focused entry points.

The customer may land on CochraneRoofingMasters.ca, CochraneBathroomRenoMasters.ca, CochraneTileMasters.ca, or any other domain. The layout should immediately tell them:

1. This is specific to exactly what I searched for.
2. This company understands this exact service.
3. This is connected to a serious local builder.
4. This feels safe, clear, and professional.
5. I can understand the process and rough pricing before I call.
6. I can trust them because the brand feels family-owned, local, and long-term.

The template should be clean and simple, but deep.

The visual language should not be cluttered. The depth should come from clear sections, useful content, pricing transparency, structured FAQs, proof, service details, and strong calls to action.

---

## ## Master Brand Message Across Every Site

Every site should carry the same emotional foundation:

**\*\*Strong Foundations For Those Who Come After Us.\*\***

This should appear in some form on every website, either in the hero subtext, about section, process section, footer, or trust section.

The message should be adapted slightly by service.

Examples:

- Roofing: "A roof should protect the family under it for decades."
- Flooring: "Floors should hold the life of the home, not just cover the room."
- Decks: "Outdoor spaces should become places where families gather for years."
- Basement Suites: "A suite should create safety, flexibility, and long-term family security."
- Concrete: "Good concrete becomes the foundation future families stand on."
- Custom Homes: "We build homes with your children and grandchildren in mind."

---

## ## Universal Site Architecture

Each service website should use the same high-level page architecture.

### ### Core Pages For Every Domain

1. **\*\*Home\*\***

2. **\*\*Services\*\***
3. **\*\*Service Detail Pages\*\***
4. **\*\*Pricing / Cost Guide\*\***
5. **\*\*Our Process\*\***
6. **\*\*Projects / Gallery\*\***
7. **\*\*Areas We Serve\*\***
8. **\*\*Area Landing Pages\*\***
9. **\*\*About\*\***
10. **\*\*Contact / Request Estimate\*\***
11. **\*\*FAQs\*\***
12. **\*\*Resources / Blog\*\***
13. **\*\*Privacy Policy / Terms\*\***

### ### Recommended URL Structure

- `/
- `/services`
- `/services/[service-name]`
- `/pricing`
- `/process`
- `/projects`
- `/areas-we-serve`
- `/areas-we-serve/[community-name]`
- `/about`
- `/contact`
- `/faqs`
- `/resources`
- `/resources/[article-slug]`

### ### SEO Logic

The homepage targets the main service keyword.

The service subpages target long-tail keywords.

The areas-we-serve pages target local neighbourhood searches.

The blog/resources section targets education, cost, comparison, and problem-aware searches.

The contact page captures the lead.

---

## ## Universal Navigation System

The navigation should be the same across all domains so the user experience feels familiar and scalable.

#### ### Desktop Navbar

Left side:

- Logo / brand name
- Small brand relationship note: "Part of Cochrane Master Builders"

Main navigation:

- Services
- Pricing
- Process
- Areas We Serve
- Projects
- About

Right side:

- Phone number
- "Request Estimate" button

#### ### Services Mega Menu

The services menu should open into a clean mega menu.

For the main hub website, this mega menu should include service clusters:

- Custom Homes
- Renovations
- Basements & Suites
- Roofing & Exterior
- Flooring & Interiors
- Concrete & Foundations
- Decks, Fences & Outdoor Living
- Mechanical & Licensed Trades
- Commercial
- Repairs & Maintenance

For individual service websites, the Services menu should show:

- Main service
- Related services
- Popular sub-services
- Back to Cochrane Master Builders hub

#### ### Mobile Navbar

Mobile should be extremely simple.

Top row:

- Logo
- Call icon
- Menu icon

Mobile drawer:

- Request Estimate button at top
- Services
- Pricing
- Process
- Areas We Serve
- Projects
- About
- Contact
- Phone number
- Email

#### ### Sticky CTA Behavior

On mobile, use a bottom sticky CTA bar:

- “Call”
- “Estimate”

This should be lightweight and not interfere with scrolling.

---

## ## Universal Homepage Wireframe

The homepage is the master template for each service website.

It should feel premium, local, clear, and conversion-focused.

### ### Section 1: Announcement / Trust Bar

Purpose: Immediately establish local trust.

Content examples:

- "Family-owned construction services for Cochrane and surrounding communities."
- "Serving Cochrane, Bearspaw, Springbank, Bragg Creek, Redwood Meadows, Canmore, and Calgary West."
- "Part of the Cochrane Master Builders service network."

UX notes:

- Keep this small.
- Do not make it look like a coupon banner.
- Use calm neutral styling.
- Let it support trust, not distract.

---

### ### Section 2: Hero Section

This is the most important section of the template.

The hero should adapt to each service but keep the same structure.

#### #### Hero Layout

Left side:

- Small eyebrow label
- Main headline
- Subheadline
- Primary CTA
- Secondary CTA
- Trust microcopy

Right side:

- Service-specific hero image, abstract 3D object, or project visual
- Optional small floating cards showing pricing, process, or trust proof

#### #### Hero Copy Formula

Eyebrow:

"Family-Owned [Service] In Cochrane"

Headline:

"[Service] Built For The Families Who Depend On It."

or

"[Service] That Protects Your Home Today And Adds Value For Years."

Subheadline:

"Clear pricing guidance, careful workmanship, and a long-term building standard from a local Cochrane team that treats your home like it matters beyond today."

Primary CTA:

"Request A Clear Estimate"

Secondary CTA:

"View Services & Pricing"

Trust microcopy:

"Local. Family-owned. Built for long-term value."

##### Hero UX Requirements

- Must load fast.
- No heavy video as default.
- Use one optimized hero image or static 3D visual.
- Avoid huge sliders.
- Avoid autoplay video above the fold.
- CTA must appear above the fold on mobile.
- Phone number or quote CTA should be immediately visible.

---

### Section 3: Trust Signal Strip

Purpose: Reduce anxiety right after the hero.

Suggested cards:

- Family-Owned
- Local Cochrane Service
- Clear Pricing Ranges
- Long-Term Workmanship
- One Trusted Builder Network

Each card should be short and scannable.

UX notes:

- Use small icon + one sentence.
- Keep motion minimal.
- Use soft hover states.

---

#### ### Section 4: Service Overview

Purpose: Show the customer they are in the right place.

This should be a card grid of the main service offerings for that specific domain.

For example, a roofing site may include:

- Roof Replacement
- Roof Repair
- Roof Inspections
- Metal Roofing
- Asphalt Shingles
- Gutters & Downspouts
- Roof Ventilation
- Ice Dam Prevention

Each card should include:

- Service name
- One-line description
- Starting price or typical range
- "Learn More" link

UX notes:

- Cards should be clean and rectangular.
- Do not overload the card with paragraphs.
- Make pricing visible where appropriate.
- Use internal links to service detail pages.

---

#### ### Section 5: Pricing Transparency Section

Purpose: Build trust and qualify leads.

This section should not promise exact pricing. It should give rough planning ranges.

Headline:

“Straightforward Pricing Guidance Before You Call.”

Section structure:

- Small jobs
- Standard projects
- Premium / complex projects
- What affects price

For each category:

- Project type
- Typical range
- What is included

CTA:

“Get A Project-Specific Estimate”

UX notes:

- Use accordions or clean cards.
- Do not bury pricing in long paragraphs.
- Include the disclaimer: “Final pricing depends on site conditions, materials, access, scope, permits, and schedule.”

---

### ### Section 6: The Process

Purpose: Make the project feel controlled and safe.

Universal process:

1. Tell Us About The Project
2. Site Review / Photos / Scope Check
3. Clear Estimate & Options
4. Scheduling & Preparation
5. Build / Repair / Install
6. Walkthrough & Closeout
7. Long-Term Support

UX component:

- Horizontal timeline on desktop.
- Vertical stepper on mobile.
- Each step gets one short paragraph.

CTA after process:

“Start With Step 1”

---

### ### Section 7: Family-Owned Legacy Section

Purpose: Differentiate emotionally.

Headline:

“Built Like It Still Matters 50 Years From Now.”

Copy angle:

“This is not disposable work. We build for families, neighbours, and the people who come after us. Whether we are replacing a roof, pouring concrete, finishing a basement, or building a custom home, the question stays the same: would we be proud if our own grandchildren inherited this?”

UX notes:

- Use warm photography if available.
- Keep it sincere and humble.
- Avoid cheesy stock-family imagery.
- Show tools, hands, materials, finished details, local places.

---

#### ### Section 8: Project Gallery / Proof

Purpose: Give confidence.

This should be a lightweight gallery.

Content blocks:

- Featured project cards
- Before/after module
- Small captions explaining what was done
- Location tag if appropriate
- Service tag

Performance rules:

- Use compressed WebP/AVIF.
- Lazy-load below the fold.
- No massive galleries on first load.
- Use 6–9 images max on homepage.
- Link to full gallery page.

---

#### ### Section 9: Areas We Serve

Purpose: Local SEO and customer reassurance.

This should appear on every service website.

Headline:

“Serving Cochrane And The Communities Around It.”

Structure:

- Primary service area: Cochrane

- Luxury acreage communities
- Calgary west / southwest communities
- Bow Valley / Canmore corridor
- Ghost Lake / Waiparous corridor

UX component:

- Searchable community grid
- Map visual or stylized regional layout
- “Popular Service Areas” cards
- Link to full Areas We Serve page

Content note:

Each domain should adapt the heading to the service.

Example:

- “Roofing Services In Cochrane, Bearspaw, Springbank, And Canmore”
- “Bathroom Renovations In Cochrane And Calgary West Communities”
- “Custom Home Builders For Cochrane Acreages, Springbank, Bearspaw, And Elbow Valley”

---

#### ### Section 10: FAQ Section

Purpose: Capture long-tail SEO and reduce objections.

Every homepage should include 6–8 FAQs.

Universal FAQ categories:

- Cost
- Timeline
- Permits
- Materials
- Warranty
- Service area
- Estimate process
- What affects pricing

UX notes:

- Use accordion.

- Use FAQ schema.
- Keep answers short but useful.
- Link to deeper resources where needed.

---

#### ### Section 11: Final CTA

Purpose: Convert.

Headline:

“Ready To Build It Properly?”

Subheadline:

“Tell us what you are planning. We will help you understand the next step, the rough range, and what it would take to do the work right.”

CTA:

“Request A Clear Estimate”

Secondary:

“Call Us”

---

#### ### Section 12: Footer

Footer should be shared across all domains.

Footer sections:

- Brand description
- Contact information
- Service links
- Areas links
- Cochrane Master Builders hub link
- Legal links
- Social links if used
- Email: [Inquiry@CochraneMasterBuilders.ca](mailto:Inquiry@CochraneMasterBuilders.ca)

Footer brand line:

“Strong Foundations For Those Who Come After Us.”

---

## ## Universal Service Detail Page Wireframe

Every website should have service detail pages for the sub-services it offers.

### ### Page Structure

1. Service-specific hero
2. Problem / outcome section
3. What we offer
4. Pricing ranges
5. What affects price
6. Our process
7. Materials / options
8. Gallery / examples
9. Areas served
10. FAQs
11. Related services
12. Contact CTA

### ### Service Detail Page Hero

Headline formula:

“[Service] In Cochrane Built For Long-Term Value.”

Subheadline formula:

“Get clear pricing guidance, careful workmanship, and a local team that understands how this work protects your home, your family, and your investment.”

CTA:

“Request An Estimate”

Secondary CTA:

“View Pricing Guide”

---

## ## Universal Pricing / Cost Guide Page

Every site should have a Pricing or Cost Guide page.

Purpose:

- Build trust.
- Qualify leads.
- Capture search traffic.
- Reduce repetitive quote questions.
- Show that the company is premium but transparent.

### ### Page Wireframe

1. Hero: "How Much Does [Service] Cost In Cochrane?"
2. Quick pricing table
3. Small / standard / premium project ranges
4. What affects cost
5. Material options
6. Labour and complexity factors
7. Permits and licensed trade considerations
8. Hidden costs customers forget
9. How to get a more accurate quote
10. FAQ
11. CTA

### ### Pricing UX Rules

- Use ranges, not fake exact prices.
- Put "starting at" only where appropriate.
- Explain why premium work costs more.
- Avoid sounding apologetic for charging properly.
- Position pricing as planning guidance.

---

## ## Universal Areas We Serve Page

The Areas We Serve page should be a major SEO asset.

### ### Page Goal

Create one reusable service-area page template that can be duplicated across all service domains.

For each service website, the page should say:

“[Service] across Cochrane, acreage communities, Calgary west, and the Bow Valley corridor.”

#### ### Page Wireframe

1. Hero: “Serving Cochrane And Surrounding Communities”
2. Short local trust intro
3. Primary service area: Cochrane
4. Community cluster cards
5. Full community list
6. Map / region visual
7. Service-specific area copy
8. Area FAQs
9. Contact CTA

#### ### Community Clusters

##### ##### Cochrane Core

- East End & Downtown Cochrane
- Cochrane Heights
- Glenbow
- GlenEagles
- Heartland
- Heritage Hills
- Hillcrest
- Riversong
- Rockland Park
- Sunset Ridge
- The Willows
- West Terrace & West Pointe

##### ##### Luxury Acreage / West Calgary / Springbank

- Bearspaw
- Watermark
- Springbank
- Springbank Hill
- Springbank Creek
- Springbank Links

- Springbank Meadows
- Pinnacle Ridge
- Windhorse Manor
- Elbow Valley
- Elbow Valley West
- Elbow Ridge
- Lott Creek
- Stonepine
- Redwood Meadows
- Bragg Creek

#### #### Calgary West / Southwest High-End Communities

- Aspen Woods
- West Springs
- Cougar Ridge
- Discovery Ridge
- Signal Hill
- Strathcona Park
- Patterson
- Crestmont
- Altadore / Marda Loop
- Elbow Park
- Mount Royal
- Britannia
- Bel-Aire
- Eagle Ridge
- Lake Bonavista Estates

#### #### Bow Valley / Canmore Corridor

- Canmore
- Three Sisters
- Silvertip
- Spring Creek
- Eagle Terrace
- Cougar Creek
- Peaks of Grassi
- Dead Man's Flats
- Harvie Heights
- Exshaw
- Lac des Arcs

#### #### Ghost Lake / Waiparous Corridor

- Ghost Lake
- Ghost Lake Village
- CottageClub at Ghost Lake
- Waiparous Village

### ### Area Landing Page Template

Each major area can have its own page.

Example URL:

`/areas-we-serve/bearspaw`

Page structure:

1. Hero: “[Service] In Bearspaw”
2. Why this service matters in Bearspaw homes
3. Typical property types in the area
4. Common project types
5. Pricing guidance
6. Process
7. Related communities
8. CTA

---

### ## Universal Contact Form

The contact form should be identical across all sites.

This is important for operations, lead routing, CRM organization, and consistency.

### ### Contact Form Fields

Required fields:

- First name
- Last name
- Email
- Phone
- Service needed
- Project location / community
- Street address or nearest intersection

- Project type
- Brief project description
- Budget range
- Ideal timeline
- Preferred contact method

Optional fields:

- Upload photos
- Upload plans / drawings
- Are permits needed?
- Is this urgent?
- Is this for your home, rental, business, or acreage?
- How did you hear about us?

#### ### Budget Dropdown

Use service-specific or universal options:

- Under \$2,500
- \$2,500–\$10,000
- \$10,000–\$30,000
- \$30,000–\$75,000
- \$75,000–\$150,000
- \$150,000–\$500,000
- \$500,000+
- Not sure yet

#### ### Timeline Dropdown

- Emergency / ASAP
- Within 2 weeks
- 1–2 months
- 3–6 months
- 6+ months
- Planning for next year

#### ### Confirmation Message

“Thanks for reaching out. We received your project details. Our team will review the scope and follow up with the best next step. If photos or plans are available, sending them early helps us give better guidance.”

#### ### Contact Form UX Notes

- Keep form visually clean.
- Use multi-step form on mobile.
- Do not show 20 fields at once on mobile.
- Step 1: Contact info.
- Step 2: Project details.
- Step 3: Budget/timeline/photos.
- Step 4: Submit.

---

## ## Reusable Component Library

### ### 1. Hero Component

Fields:

- Eyebrow
- Headline
- Subheadline
- Primary CTA
- Secondary CTA
- Hero visual
- Trust badges
- Price anchor card

### ### 2. Service Card Grid

Fields:

- Icon
- Service name
- Short description
- Typical range
- Link

### ### 3. Pricing Range Cards

Fields:

- Project level
- Range
- Included scope
- Best for

- CTA

#### ### 4. Process Timeline

Fields:

- Step number
- Step title
- Step description
- Optional icon

#### ### 5. Areas We Serve Grid

Fields:

- Community name
- Short detail
- Link
- Cluster category

#### ### 6. Before / After Gallery

Fields:

- Before image
- After image
- Project type
- Location
- Short description

#### ### 7. FAQ Accordion

Fields:

- Question
- Answer
- Schema markup

#### ### 8. Related Services Block

Fields:

- Service title
- One-line description

- Link

#### ### 9. Family Legacy Brand Block

Fields:

- Slogan
- Short legacy copy
- Optional photo
- CTA

#### ### 10. Contact Form

Fields:

- Shared form fields
- Hidden domain/source tracking
- Service-specific default selection

---

### ## Universal Page Templates

#### ### Home Page Template

This is the full conversion page.

Sections:

1. Trust bar
2. Hero
3. Trust signal strip
4. Service overview
5. Pricing guidance
6. Process
7. Family legacy block
8. Project proof
9. Areas we serve
10. FAQ
11. Final CTA
12. Footer

#### ### Services Page Template

Sections:

1. Hero
2. Main service category intro
3. Full services grid
4. Related service clusters
5. Pricing note
6. CTA

#### ### Service Detail Page Template

Sections:

1. Service hero
2. Problem / outcome
3. What we offer
4. Pricing
5. What affects price
6. Process
7. Gallery
8. Areas
9. FAQ
10. CTA

#### ### Pricing Page Template

Sections:

1. Pricing hero
2. Range table
3. Price factors
4. Example project scenarios
5. Premium vs cheap work explanation
6. Quote process
7. FAQ
8. CTA

#### ### Areas Page Template

Sections:

1. Areas hero
2. Regional clusters
3. Community list

4. Map visual
5. Service-specific local copy
6. FAQs
7. CTA

### ### About Page Template

#### Sections:

1. Brand hero
2. Family-owned story
3. Long-term building philosophy
4. Values
5. Master Builders network explanation
6. Why local matters
7. CTA

### ### Projects Page Template

#### Sections:

1. Projects hero
2. Filter by service
3. Filter by community
4. Featured case studies
5. Before/after gallery
6. CTA

### ### FAQ Page Template

#### Sections:

1. FAQ hero
2. Cost questions
3. Timeline questions
4. Materials questions
5. Permit questions
6. Service-area questions
7. Warranty questions
8. CTA

---

### ## Service Category Template Variations

The base template stays the same, but the emphasis changes by service category.

### ### Custom Homes

Primary customer mindset:

They are making a serious legacy decision and want confidence.

Template emphasis:

- Larger, calmer hero
- Lot-fit and planning module
- Design-build process
- Budget qualification
- Portfolio and craftsmanship proof
- Strong consultation CTA

Unique components:

- "Build Readiness Checklist"
- "Lot + Lifestyle Planning Module"
- "Custom Home Budget Range Cards"
- "Design-Build Timeline"

---

### ### Renovations

Primary customer mindset:

They are anxious about disruption, budget creep, and trust.

Template emphasis:

- Clear process
- Dust protection
- Phasing
- Pricing transparency
- Before/after proof

Unique components:

- "Renovation Scope Builder"

- “Occupied Home Protection Plan”
- “Before / After Slider”
- “What Changes The Price?” module

---

#### ### Basements / Suites

Primary customer mindset:

They want more space, rental income, family flexibility, or legal compliance.

Template emphasis:

- Legal suite trust
- Egress, fire separation, permits
- Rental potential
- Family living

Unique components:

- “Legal Suite Readiness Checklist”
- “Basement Income Potential Planner”
- “Egress Window Explainer”
- “Code & Permit Stepper”

---

#### ### Exterior Envelope

Primary customer mindset:

They want protection, energy efficiency, durability, and curb appeal.

Template emphasis:

- Weather resistance
- Long-term maintenance
- Material comparison
- Emergency repair trust

Unique components:

- “Weather Protection Scorecard”

- “Material Comparison Cards”
- “Storm / Hail Damage CTA”
- “Before Winter Checklist”

---

#### ### Interior Renovations

Primary customer mindset:

They want better daily living, comfort, aesthetics, and resale value.

Template emphasis:

- Visual warmth
- Functionality
- Finish quality
- Practical pricing guidance

Unique components:

- “Room Upgrade Planner”
- “Finish Level Selector”
- “Style Inspiration Cards”
- “Daily Life Improvement Grid”

---

#### ### Structural / Rough-In

Primary customer mindset:

They want safety, compliance, and competent technical execution.

Template emphasis:

- Engineering trust
- Safety
- Hidden-work transparency
- Permit coordination

Unique components:

- “Behind The Walls Explainer”

- “Inspection & Engineering Workflow”
- “Structural Risk Warning Module”
- “Proper Method vs Shortcut Comparison”

---

#### ### Outdoor / Landscape

Primary customer mindset:

They want lifestyle, curb appeal, gathering space, and low-maintenance beauty.

Template emphasis:

- Lifestyle visuals
- Seasons
- Outdoor family life
- Property value

Unique components:

- “Outdoor Living Planner”
- “Seasonal Maintenance Guide”
- “Yard Zone Map”
- “Family Gathering Space Visual”

---

#### ### Mechanical / Licensed Trades

Primary customer mindset:

They want safety, reliability, comfort, and fast help.

Template emphasis:

- Licensed coordination
- Emergency clarity
- Comfort outcomes
- System reliability

Unique components:

- “Emergency CTA Strip”

- "System Health Checklist"
- "Repair vs Replace Explainer"
- "Maintenance Plan Cards"

---

### ### Commercial

Primary customer mindset:

They care about downtime, code, budget, schedule, and opening on time.

Template emphasis:

- Schedule confidence
- Phasing
- Business continuity
- Code coordination

Unique components:

- "After-Hours Work Plan"
- "Tenant Improvement Timeline"
- "Downtime Reduction Module"
- "Landlord / Permit Coordination Checklist"

---

### ### Repairs / Maintenance

Primary customer mindset:

They want fast, trustworthy help without overcomplication.

Template emphasis:

- Simple CTA
- Common repair menus
- Pricing minimums
- Trust and speed

Unique components:

- "Common Repairs Menu"

- “Book A Small Job”
- “Photo Upload First”
- “Maintenance Package Cards”

---

## ## SEO Template Rules

Every site should use the same SEO framework.

### ### Homepage SEO

Title format:

“[Service] In Cochrane | Family-Owned [Service] Contractors”

Meta description format:

“Family-owned [service] in Cochrane with clear pricing guidance, local workmanship, and long-term value. Request an estimate from Cochrane Master Builders.”

### ### Service Page SEO

Title format:

“[Sub-Service] In Cochrane | [Brand Name]”

### ### Area Page SEO

Title format:

“[Service] In [Community] | Cochrane Master Builders”

### ### Schema To Use

- LocalBusiness
- Service
- FAQPage
- BreadcrumbList
- Review schema where compliant
- Organization
- ContactPoint

---

## ## Performance Optimization Requirements

Performance must be baked into the wireframe.

### ### Targets

- LCP under 2.5 seconds
- CLS under 0.1
- INP under 200ms
- Mobile-first experience
- No heavy homepage sliders
- No autoplay video above the fold
- Minimal third-party scripts

### ### Image Rules

- Hero image must be compressed and sized properly.
- Use AVIF or WebP.
- Lazy-load all below-fold images.
- Use responsive image sizes.
- Never load full gallery images on first page load.

### ### Animation Rules

- Use motion sparingly.
- Scroll animations should support clarity, not overwhelm.
- Prefer opacity, transform, and subtle reveal effects.
- Avoid layout-shifting animations.
- Respect reduced-motion settings.

### ### Form Rules

- Contact form should load fast.
- Use lightweight validation.
- Do not depend on heavy third-party form embeds if avoidable.
- Store domain/source info with hidden fields.

### ### Code Architecture

Recommended stack:

- React 18
- Vite

- Static-first pages where possible
- Shared component library
- JSON/content config per domain
- Lightweight routing
- Minimal JS for above-fold rendering

---

## ## Content Configuration System

To scale this across 115 sites, the template should be data-driven.

Each domain should have a config file with:

- Domain name
- Brand name
- Service category
- Main headline
- Subheadline
- Service menu
- Pricing ranges
- Related services
- Areas served
- FAQs
- Gallery images
- Colour theme
- UX theme
- Contact form default service
- SEO title
- Meta description
- Schema settings

This prevents rebuilding each site manually.

---

## ## Suggested Global Template Sections In Order

### ### Homepage Order

1. Trust bar
2. Navbar
3. Hero
4. Trust signals

5. Services grid
6. Pricing preview
7. Process
8. Family legacy block
9. Project proof
10. Areas we serve
11. FAQs
12. Final CTA
13. Footer

### ### Service Page Order

1. Navbar
2. Service hero
3. Problem / desired outcome
4. Service menu
5. Pricing
6. Process
7. Materials / options
8. Areas served
9. FAQ
10. Related services
11. Contact CTA
12. Footer

---

## ## Universal Contact Form Wireframe

### ### Desktop Layout

Left column:

- Headline
- Trust copy
- Phone number
- Email
- Short explanation of what happens next

Right column:

- Form card

### ### Mobile Layout

Use a step-by-step form.

Step 1: Contact info

Step 2: Project type

Step 3: Location / timeline / budget

Step 4: Photos and final note

#### ### Form Fields

- Name
- Email
- Phone
- Community / area
- Address or nearest intersection
- Service needed
- Project description
- Budget range
- Timeline
- Upload photos
- Preferred contact method

#### ### Submission UX

After submit:

- Show confirmation state.
- Explain next step.
- Offer button to call if urgent.
- Optional: "Send more photos by replying to our email."

---

#### ## Best Base Template Page List

For each individual service website, start with these pages:

1. Home
2. Services
3. Pricing
4. Process
5. Areas We Serve
6. Projects
7. About

- 8. Contact
- 9. FAQs
- 10. Blog / Resources

For larger domains, add sub-pages:

- `/services/[specific-service]`
- `/areas-we-serve/[community]`
- `/resources/[topic]`

---

## ## Best Base Navigation Labels

Use plain labels.

Recommended:

- Services
- Pricing
- Process
- Areas
- Projects
- About
- Contact

Avoid:

- Solutions
- Capabilities
- Explore
- Innovations
- Excellence

This is construction. Clarity beats cleverness.

---

## ## Footer Structure

### ### Footer Column 1: Brand

- Logo
- Short description

- Slogan

#### ### Footer Column 2: Services

- Main services
- Related services

#### ### Footer Column 3: Areas

- Cochrane
- Bearspaw
- Springbank
- Elbow Valley
- Bragg Creek
- Canmore

#### ### Footer Column 4: Contact

- Inquiry@CochraneMasterBuilders.ca
- Phone
- Request Estimate button

#### ### Footer Bottom

- Privacy Policy
- Terms
- Copyright
- "Part of the Cochrane Master Builders network"

---

## ## Copywriting Rules For The Template

#### ### Always Say

- Family-owned
- Local
- Cochrane
- Clear pricing guidance
- Built for long-term value
- Neighbours
- Strong foundations
- Workmanship
- Safety

- Home value

#### ### Avoid Saying Too Much

- “Cheap”
- “Lowest price”
- “Best in the world”
- “Guaranteed cheapest”
- Overly flashy claims
- Overcomplicated construction jargon without explanation

#### ### Tone

- Strong
- Clear
- Humble
- Practical
- Trustworthy
- Premium without sounding arrogant

---

#### ## Final Wireframe North Star

This template should make every domain feel like a specialized front door into one trusted local building company.

The website should feel clean, calm, and premium.

The content should feel specific, useful, and deeply local.

The UX should reduce anxiety and create clarity.

The SEO should capture service-specific and community-specific demand.

The performance should be fast enough to feel professional on mobile.

The brand should always return to one idea:

**\*\*Strong Foundations For Those Who Come After Us.\*\***

---

#### ## Build Recommendation

Build this as a single master template system, not 115 separate hand-built designs.

Recommended structure:

- One shared component library.
- One shared layout system.
- One shared contact form.
- One shared nav and footer.
- One shared areas-we-serve component.
- One config file per service domain.
- One SEO/schema generator.
- One project gallery component.
- One pricing component.
- One FAQ component.

This keeps the system consistent, efficient, scalable, and easier to maintain.

---

## ## Final Template Summary

The best base wireframe is:

**\*\*Hero → Trust → Services → Pricing → Process → Legacy → Proof → Areas → FAQ → Contact.\*\***

That sequence works because it follows the customer's mind:

1. Am I in the right place?
2. Can I trust this company?
3. Do they offer what I need?
4. What might it cost?
5. What happens next?
6. Why are they different?
7. Have they done this before?
8. Do they serve my area?
9. What questions do I still have?
10. How do I contact them?

That is the foundation of the whole Cochrane Master Builders website ecosystem.
